IS 445 - Data Visualization - Weekly Report 1

The above visualization depicts the proportion of all the Registered Student Organizations (RSOs) listed on the Involved@Illinois website that fall under different groups based on their activity.

The blue circles indicate the class of RSOs, and their sizes give an approximation of the number of RSOs under that category, but the visualization does not provide any numerical data on how much of the total the specific category contributes to.

The orange line joining two blue circles tells us about the connection between the different classes of RSOs, but at first glance it is difficult to infer the meaning of the variation in the thickness of the lines.

A legend is not provided, which can help us with the underlying data figures.
